🧠 SKILLS

Mobile Development

- Native iOS Swift/SwiftUI
- Native Android Kotlin
- Cross-platform: Flutter/Dart

Web3

- Solidity
- Typescript
- General Dapp/DeFi Infra
- Security

Cloud

- AWS
- Azure
- GCP

AI

- Claude/Codex/Copilot Setup
- Agent orchestration

Product

- Customer-first approach
- Experience taking products from concept to launch across fintech, marketplace, and crypto domains
- Comfortable bridging product and engineering, owning trade-offs and prioritisation
- Ship fast, iterate based on feedback

📁 PROJECTS

Git Gazette

AI-powered GitHub repo newspaper

👤 ABOUT ME

Senior Mobile Engineer with 16 years of software development experience, specialising in Flutter and native iOS/Android. Deep domain expertise in crypto and blockchain, including multichain MPC wallets, on-chain asset management, and platform migrations. Based in New Zealand, originally from Argentina. Passionate about building products that bridge complex technology with great user experience.

📁 EXPERIENCES

Swyftx

Senior Engineer

12/2025 – Present | New Zealand

- Led the technical migration of Easy Crypto wallet users to the Swyftx platform following the acquisition.
- Designed fund migration systems for non-custodial MPC wallet transfers utilizing batch on-chain transactions and EIP-7702.
- Built a wallet backup service to ensure secure private key migration.
- Executed the project across dual platforms and codebases throughout the integration.

Easy Crypto NZ

Senior Engineer (Mobile)

2023 – 12/2025 | New Zealand

- Effectively designed a multichain MPC wallet compatible with both EVM and UTXO networks.
- Managed client integration, backend services, node providers, and the development and deployment of smart contracts using Hardhat/Foundry.
- Led technical implementation of New Zealand's NZDD stablecoin.

ASB Bank

Senior iOS Engineer (Mobile)

2022 – 2023 | New Zealand

- Led migration of the mobile banking app from UIKit to SwiftUI
- Designed and implemented the Spend Tracker feature for customer financial wellbeing
- Contributed to a large-scale iOS codebase serving millions of NZ banking customers
- Collaborated cross-functionally with product, design, and backend teams

Accedo.tv

Senior iOS Mobile engineer

2018 – 2022 | New Zealand

- Led development of the Les Mills Releases native iOS application

Holdii

Programmable on-chain asset release and inheritance vault platform

MateFAI

AI-powered DeFi portfolio advisor that reads wallet positions and recommends optimised yields in plain language

Youtube

Spanish-language crypto and DeFi channel with 70k+ subscribers, targeting LATAM audience

- Built and maintained video OTT streaming services using Swift, SwiftUI, and UIKit
- Delivered end-to-end video playback, content delivery, and subscription features for a global fitness platform
- Worked with streaming protocols and media frameworks to ensure reliable video performance across iOS devices

Mascoteros (Spanish Startup)

Lead iOS Architect

2017 – 2018 | Barcelona

- Led mobile architecture and development from day zero for a pet goods marketplace app
- Owned the full development lifecycle including architecture, implementation, testing, and release management
- Acted as bridge between product and engineering, translating business requirements into technical solutions
- Built and shipped a marketplace platform covering product listings, search, ordering, and user management

Etermax

Lead iOS Dev

2014 – 2015

- Led development of shared iOS codebase powering multiple hit mobile games including Trivia Crack (#1 on the App Store) and Aworded
- Architected reusable iOS components and frameworks in Objective-C shared across the game portfolio
- Contributed to products reaching tens of millions of downloads and top App Store rankings globally
- Collaborated with multiple game teams to ensure consistent performance, quality, and code reuse across titles

Indra

Analyst Programmer

2011 – 2014

- PL/SQL & Teradata dev. Worked with ETL processes and db jobs design.

Telecom Argentina

Analyst Programmer

2011 – 2009

- PL/SQL & MsSQL dev.

Oracle

PL/SQL Developer

2008 – 2009
